EPA Launches Electronic Waste Tracking System

The U.S. Environmental Protection Agency (EPA) has launched the Hazardous Waste Electronic Manifest System (e-Manifest). The system will improve access to higher quality and more timely hazardous waste shipment data and save industry and states valuable time and resources to the tune of $90 million annually.

New Proposed Tariff List Includes More Lighting Targets

The Office of the United States Trade Representative has released the latest list of products made in China that could potentially face new tariffs as a part of the ongoing trade war between the United States and China. In a decision that was somewhat unexpected, a number of lighting products and components are on the new list.

Federal Register Notice on Proposed SNUR for Asbestos

EPA is proposing a significant new use rule (SNUR) for certain uses of asbestos (including asbestos-containing goods) that would require manufacturers and importers to receive EPA approval before starting or resuming manufacturing, and importing or processing of asbestos.
